

# Case Study.

**Client:** Bridal Outlet (Retail)

**Location:** Chelmsford, Essex

**Duration:** 1 Week

## Bridal Outlet

Installation of 2no 10kw Mitsubishi Heavy Industry units to the new showroom and changing rooms. As the property had no central heating this showroom needed year round climate control to make the space comfortable for prospective clients.

With no ceiling void the wall mounted unit was the best solution and enabled a very neat and quick installation time. MHI heat pump inverter equipment installed.
