

Case Study.

Client: Healthcare

Location: NW9, London

Duration: 2 Weeks

Healthcare

Our client, a medical imaging specialist company, required comfort cooling to their new office space. During the office relocation we decommissioned and moved 4no Daikin cassettes to the new premises and fully commissioned them in the new location.

We also supplied and installed **11no new Mitsubishi Heavy Industry Heat pump R32 systems** throughout the building. These systems varied in capacity and design - from 3.5kw wall mounted units in some smaller offices, to 7kw and 10 kw under ceiling and cassette style systems in larger open plan areas.

The Project completed on a very tight deadline, working in double shifts over the Christmas period, in order to be up and running in time for the offices staff moving over at the start of the new working year.
